### Discussion I: Key Policy Recommendations

Thursday, 2nd of June 2016. Knappgården, Särna, Sweden

# What do the results tell us?

- Most of those supporting nature protection, and who are willing to pay for it, are probably not motivated by their own use, although they may retain an option use value
- WTP exists and increases with the size of the extended area to be protected
- WTP for the domestic part is greater in both samples – no perfect international public good?
- Difference between WTP for domestic and foreign extension is lower in Sweden than in Norway
- Both samples attached somewhat more importance to the extension of the national park within their national border
- Most respondents understood well the questionnaire

# Which should be the key policy recommendations based on results?

# Contextual reality

- Conflicts
  - *National vs. Local*
  - *Conservationism vs. Industry (forestry, tourism)*
- Recentness
  - *Lack of knowledge*
  - *Insufficiently rooted*
- Lack of interest?
- Scandinavian nature protection traditions

# Which are feasible recommendations to be communicated?

- Is extension of the protected area "politically possible" in the near future?

# Which are feasible recommendations to be communicated?

- Is extension of the protected area "politically possible" in the near future?
- Can "people's voice" / WTP be emphasized in decisions?

# Which are feasible recommendations to be communicated?

- Is extension of the protected area "politically possible" in the near future?
- Can "people's voice" / WTP be emphasized in decisions?
- Would estimated positive WTP constitute a strong enough argument for decision-makers?
- Would this WTP for park extension "make up" for a renewed conflict with forestry and local interests?

# Which are feasible recommendations to be communicated?

- Is extension of the protected area "politically possible" in the near future?
- Can "people's voice" / WTP be emphasized in decisions?
- Would estimated positive WTP constitute a strong enough argument for decision-makers?
- Would this WTP for park extension "make up" for a renewed conflict with forestry and local interests?
- May policy makers be willing to adopt this novel "renaturation" perspective?

# Which are feasible recommendations to be communicated?

- Is the protected area "big enough"?

# Which are feasible recommendations to be communicated?

- Is the protected area is "big enough"?
- Do you conceive Fulufjäll as part of a larger protected area?

# Which are feasible recommendations to be communicated?

- Is the protected area is "big enough"?
- Do you conceive Fulufjäll as part of a larger protected area?
- To whom should policy recommendations be addressed?

# Further discussion topics

- What would need to contextually change so that key policy recommendations turn feasible?

# Further discussion topics

- What would need to contextually change so that key policy recommendations turn feasible?
- How does the existence of the border affect the TNPA from a natural, socio-economic and organisational perspective?
